WE HAVE A DUTY TO RECOGNISE AND ESTABLISH THE IMPORTANCE OF PLAY. IT IS IN OUR DNA. CHILDHOOD IS THE KEY TO SHARING, CARING AND LEARNING; FMOSH IS THE DOOR TO A FEEL GOOD FACTOR PROJECT THAT WILL RECALL MEMORIES IN OUR SHARED HISTORY.

FMOSH Summary

- Research community / local / regional / games that add to a shared history through sport (includes a Living History). Young people interview: parents, carers, guardians, relatives and senior citizens, regarding their experiences playing games/sports in their community.

- Exhibition of their research displayed in the community and uploaded onto the FOOTBALL MAKES OUR SHARED HISTORY (FMOSH) webpage. At the same event a designated area of play will be twinned (through a game / match / tournament) with Flanders Peace Field, Mesen, Belgium, site of the First World War, 1914, Christmas truces. A FMOSH Plaque will be displayed at the area of play; and a duplicate FMOSH Plaque will be displayed in Flanders Peace Field.

NATIONAL CHILDREN'S FOOTBALL ALLIANCE

The PEACE POPPY FOOTBALL

Football Makes Our Shared History (FMOSH) focuses on games (football, GAA, rugby, hockey, cricket, basketball and netball) heritage in the community. The essence of games in communities across the province and how it's contributed and continues to influence a multicultural society. FMOSH will bring together a wide range of communities in order to explore and research a recorded, physical, oral and living history of football. Heritage through community games – focusing on women, ethnic minorities, children and special needs, lends itself to a generation of young people to take ownership of the project and celebrate heritage.

The Island of Ireland Peace Tower, Flanders.

- improved cross-curricular formal and non-formal learning,
- increased understanding of diversity through the power of sport,
- a better understanding of conflict intervention and resolution through historical grass roots games
- an appreciation of commonality
- stronger inter-generational relationships
- better physical health and emotional well-being
- young people will be competent in heritage research, organising events to celebrate a shared heritage, project management and critical historical analyses.
- FMOSH will present an opportunity for designated areas of play to twin with Flanders Peace Field, Mesen, Belgium, site of the 1914 First World War, Christmas Truces. Thus, creating a tangible legacy and sustainable peace events stemming from FMOSH.

“Like every young child I was a football fanatic, I would kick a coke can around the street just to play football” **Richard Moore, Children in Crossfire.**
