

Graffiti Workshop:

Are you also someone who thinks that graffiti art is a piece of cake or contrariwise absolutely not? Is it something on your bucket list, but unfortunately not achieved yet? Or you are afraid that it is not achievable? Well, this is your chance to do it after all! It is for sure, that you are not alone and that it will be a unique experience!

We will start with a common explanation of a real “writer” and then will put on our protection suit! When everyone is protected you will get the chance to make a sketch and together, we will design a personal tag, cartoon, message or something else. Afterwards you can realize your first real piece of graffiti art!

Organization:

Fresh, sober and personal

A good graffiti artist is not automatically a good teacher. The workshops are provided by our permanent team. Our graffiti team consist of people who have a passion for teaching and entertaining and who think it is important to inspire, to activate and to motivate people. We work in a fresh, sober and above all a personal way. We try to pass this over during every graffiti workshop.

Our goal is to make sure that everyone is involved from start to finish.

The theme of the graffiti workshop will explore PEACE.
