

Graffiti Workshop:

Are you also someone who thinks that graffiti art is a piece of cake, or absolutely not? Is it something on your bucket list, but unfortunately not achieved yet? Or are you afraid that it is not achievable? Well, this is your chance to do it after all! It is for sure that you are not alone and that it will be a unique experience!

We will start with a common explanation of a real “writer” and then put on our protective masks. When everyone is protected, you will get the chance to make a sketch and together, we will design a personal tag message for peace. Afterwards, you can realise your first real graffiti art! Do you already know where you will hang out your “Peace Art”?

THIS WORKSHOP IS THANKS TO THIS COUNTRY 4 PEACE.

The workshop is facilitated by an experienced graffiti artist. The graffiti team consists of people who have a passion for teaching and entertaining and who think it is important to inspire, to activate and to motivate people. They work in a fresh, sober and above all a friendly way. They try to pass this positive message on during every graffiti workshop.

Our goal is to make sure that everyone is involved from start to finish.

The theme of the graffiti workshop will explore PEACE.
